EKI RINALDO

Cloud & DevOps Engineer | IT Infrastructure Specialist
JL. H Sahril No: 09, Halim Perdana Kusuma, Jakarta Timur | WA: 081380833898 | Email: ekirinaldo86@gmail.com

PROFESSIONAL SUMMARY

Result-driven Cloud & DevOps Engineer and IT Infrastructure Specialist with 4 years of comprehensive experience, encompassing 3 years of IT Support Leadership (from basic helpdesk to senior escalation) and 1 year of focused Cloud & DevOps engineering. Proven expertise in designing private cloud environments (OpenStack, MicroCloud), Infrastructure as Code (Ansible), and CI/CD automation (GitHub Actions, Jenkins). Adept at bridging development and operations, managing complex network infrastructures (MikroTik), and developing custom full-stack business solutions (IoT, POS).

CORE COMPETENCIES & TECHNICAL SKILLS

- DevOps & Automation: Infrastructure as Code (Ansible), CI/CD Pipelines (GitHub Actions, Jenkins), Docker, Mass Server Hardening, Automated Updates/Upgrades.
- Cloud & Virtualization: OpenStack (Neutron, Router HA, Floating IP, NAT, Dual-stack IPv4/IPv6), DevStack, MicroCloud, MicroOVN, MicroCeph, Proxmox, VirtualBox.
- System & Directory Administration: Linux (Ubuntu, RedHat, Fedora), Windows Server, macOS, Active Directory (Samba, Zentyal, Univention Corporate Server/UCS).
- Networking & Security: MikroTik (Routing, Firewall, Traffic Management, Router HA, DNS, DHCP, LAN/WAN), Ethical Hacking concepts, System Hardening.
- Programming & Fullstack: Python (REST API), Java (Quarkus), PHP, React.js, JavaScript, HTML5, CSS3, Bash, PowerShell, Selenium (SQA).
- IT Support & IoT Leadership: Team Leadership, Hardware/Software Troubleshooting, Remote Support (RDP, TeamViewer), IoT Fingerprint Systems, Biometric Access Control (Solution X170).

PROFESSIONAL EXPERIENCE

PT Danamas Insan Kreasi Andalan | Cloud & IT Infrastructure Engineer (2022 – Present)

Cloud, DevOps & Infrastructure Engineering:

• Design, deploy, and manage IT infrastructure and private cloud environments, operating OpenStack on Ubuntu Server with advanced networking (Neutron debugging, Router HA, Floating IP, NAT, dual-stack IPv4/IPv6).
• Implement Infrastructure as Code (IaC) using Ansible to automate server configurations, mass OS updates/upgrades (RedHat/Ubuntu), and execute mass security hardening across the infrastructure.
• Engineer and maintain automated CI/CD deployment pipelines using GitHub Actions and Jenkins for seamless production releases.
• Manage distributed storage (MicroCeph) and virtual networking (MicroOVN) within containerized workloads using Docker and MicroCloud.
• Build and maintain Active Directory and Identity Management services using Samba, Zentyal, and Univention Corporate Server (UCS).
• Configure enterprise routing, firewall rules, and traffic management using MikroTik to ensure network security and high availability.

IT Support Leadership & Operations:

• Lead the IT Support team, handling operations from basic helpdesk troubleshooting to senior-level infrastructure escalation.
• Provide comprehensive hardware/software troubleshooting and remote support (RDP, TeamViewer, AnyDesk) for cross-platform environments (Windows, Linux, macOS).
• Conduct routine data backups, disaster recovery processes, and continuous monitoring of server/network performance.
• Manage dozens of biometric access control machines (Ginger Solution X170) and fingerprint attendance devices, ensuring seamless integration with internal systems.

KEY PROJECTS & ACHIEVEMENTS

1. Mass Server Hardening & Configuration Management
Architected an automation framework using Ansible to perform mass security hardening, patch management, and system upgrades across RedHat and Ubuntu servers, significantly reducing manual workload and improving security posture.

2. IoT Fingerprint & Access Control System (PT DIKA)
Developed a custom IoT Fingerprint system and managed dozens of space access machines (Ginger Solution X170). Built a custom fullstack attendance management system using Python (REST API), HTML, CSS, and JavaScript to pull, process, and display real-time biometric data centrally.

3. "Kasirku" Point of Sale (POS) System
Developed a custom POS application for a retail grocery project (Toko Sembako) utilizing Java (Quarkus), PHP, React.js, CSS, and HTML.

4. High-Availability Multi-Node Private Cloud Cluster
Designed and implemented a highly available private cloud cluster incorporating distributed storage and containerized workloads with Router HA and production-ready deployment pipelines.

EDUCATION & CERTIFICATIONS

- **Universitas Mohammad Husni Thamrin:** Bachelor of Computer Science (S-1) - Teknik Informatika (Graduated: August 22, 2022)
- **Red Hat System Administration I (RH124 - RHA) - Ver. 10:** Red Hat Academy (Oct 2026 | 40 Credit Hours)
- **SQA Automation Engineer:** Juara Coding
- **Building a Homelab with MicroCloud:** BrightTALK
- **Ethical Hacking 101: Beginner's Guide:** Simplilearn SkillUP
- **MikroTik Mini Class:** IDN Networkers Webinar
- **Webinar OCR di atas Ubuntu:** ITTS
